Declaration of conformity with the EU REACH chemicals regulation

Dear Sir or Madam,

As the pre-registration phase for all chemical products has now come to an end and the list has been published by the European Chemical Agency (ECHA), we, as subordinate users, have taken all necessary measures to ensure compliance with the requirements set forth in REACH. To the extent verifiable on the basis of current knowledge, we are now capable of procuring and processing all substances required for our production processes.

The Candidate List of substances of concern (SCIP) issued by the ECHA and the EU Commission serves as the basis that enables us to provide our customers with sufficient information to ensure that such substances can be used safely and reliably, or at least to provide the names of the substances in question. This is the case whenever a product has a concentration of more than 0.1 percent (by weight) of the substance in question. We react directly to newly published extensions to the SVHC list and instantly evaluate our products accordingly.

We will inform you immediately and on our own initiative as soon as we become aware that a product delivered to you contains a substance of very high concern that is cited in the Candidate List.

Please understand that we cannot respond to every individual enquiry due to the sheer volume of requests. You can be assured that we will continue to make every effort to comply with the requirements of the REACH regulation and will continue to supply you with products of the quality to which you are accustomed.

Sincerely,

RINGSPANN GmbH

ppa. Dipl.-Ing. Ernst Fritze
Director Technical, Production & Procurement
